Tutorial

"IC Design for Manufacturability - a short tutorial"

Session Coordinator: Prof. Wieslaw Kuzmicz, Warsaw University of Technology, Poland

W. Kuzmicz (Warsaw University of Technology, Poland) - "Introduction to design for manufacturability: random variations"

Z. Jaworski (Warsaw University of Technology, Poland) - "Methodologies for yield optimization and design centering"

E. Gadjeva (Technical University of Sofia, Bulgaria) - "Enhancement of general-purpose simulators for manufacturability oriented simulation of IC designs"

E. Piwowarska (Warsaw University of Technology, Poland) - "Propagation problems in interconnections"

Tutorial information
